

Claude moved from Montreal to Kemptville over 40 years ago and considers this town her home. She is a graduate from Kemptville college in the Landscaping and Horticulture program and started her own landscaping company in 1992.

Most of her career was in Human Resources before she decided to go back to college, where she found her true vocation. Claude started teaching at Kemptville college in Horticulture during the winter months and became the Coordinator of the Horticulture programs. Recently, she has revitalized the greenhouses at the campus and has opened them to the public, along with giving workshops.

She now divides her time between the Kemptville Youth Centre and the greenhouses at the Kemptville campus.
